

# DUB EDITION DUBw10 TECHNICAL DATA

## Key Features

- 2" High Temperature Voice Coil with 10mm Xmax
- Heavy Duty Motor Structure with 30 oz Magnet
- Power Handling: 250 Watts RMS, 1000 Watts Peak
- Sensitivity (2.83V/1M): 89.5dB
- Injected Molded Polypropylene Cone
- Nitrile Rubber Surround for excellent damping
- Nomex-reinforced spiders for excellent linearity
- Klippel laser-optimized magnet systems for deep bass performance
- Optimized "Q" for Closed and Ported Enclosures
- Reinforced black textured, low-resonance steel basket
- Grilles Included

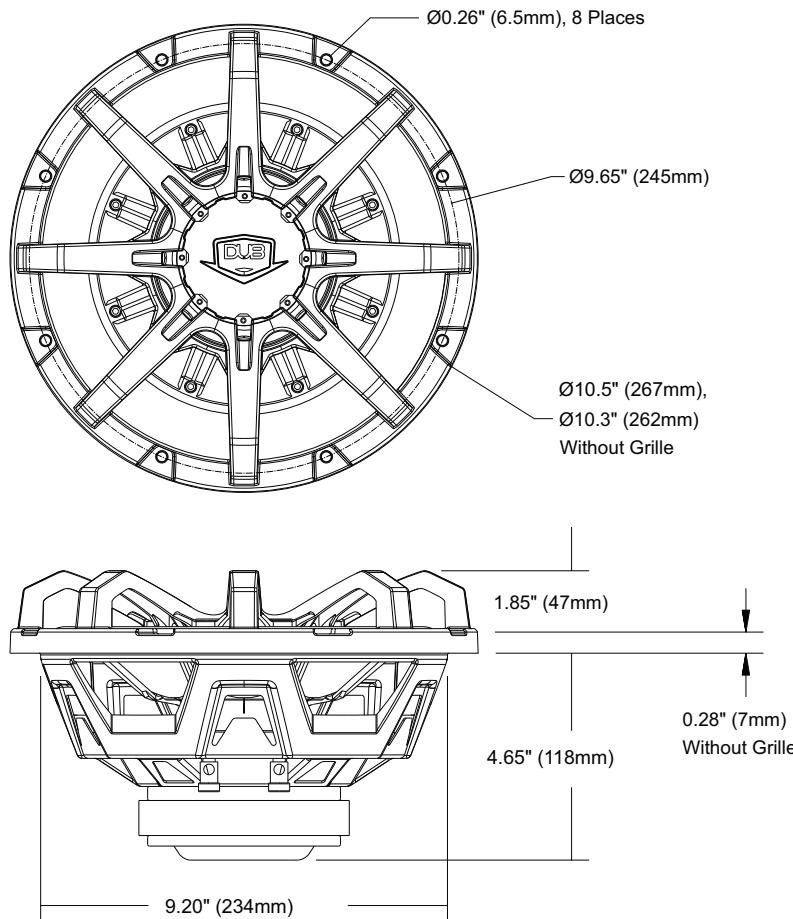

## Características Principales

- Bobina de alta temperatura de 5cm (2") reforzada con Xmax de 10mm
- Estructura de motor reforzada con imán de 0.85 kg (30 onzas)
- Capacidad de potencia 250 Vatios RMS, 1000 Vatios Máxima
- Sensibilidad (2.83V/1M): 89.5dB
- Cono de polipropileno moldeado por inyección
- Bordes de goma de nitrilo para una amortiguación excelente
- Spider reforzados con Nomex para una excelente linealidad
- Sistemas de imanes Klippel optimizados a láser proveen un profundo rendimiento de graves
- "Q" optimizado para gabinetes cerrados y con puertos
- Gabinete de acero de baja resonancia, resistente a deformaciones, negro
- Con rejillas

## Caractéristiques Principales

- Bobine à Haute Température avec 10mm Xmax
- Heavy Duty Structure de moteur avec Aimant de 30oz
- Manipulation de puissance: 250 Watts RMS, 1000 Watts Maximum
- Sensibilité (2.83V/1M): 89.5dB
- Des cônes de caisson de basse à polypropylène à moulé par injection
- De la suspensions en caoutchouc nitrile pour un amortissement excellent
- Spider Nomex renforcés pour une excellente linéarité
- Des systèmes d'aimants optimisés à laser Klippel fournissent une performance de basse profond
- Optimisé "Q" pour fermé et porté Boîtiers
- Noir, résistant à la déformation, résonance basse panier en acier
- Des grilles incluses

## Dimensions

## Specifications/Caractéristiques/Especificaciones

Power Handling (RMS).....	250W
Power Handling (Peak).....	1000W
Frequency Response.....	25-250Hz
Efficiency.....	93dB (1W in-car) 89.5dB (2.83V/1m) 86.5dB (2V/1m)
Voice Coil Diameter.....	2" (50mm)
Impedance.....	4 ohms
Nom. Diameter.....	10" (250mm)
Outer Diameter.....	10.5" (267mm)
Cutout Diameter.....	9.20" (234mm)
Mounting Depth.....	4.65" (118mm)
Grille Height.....	1.85" (47mm)

## Thiele-Small Parameters/Parámetros/Paramètres

Fs.....	30.4Hz
Qts.....	0.55
Qes.....	0.64
Qms.....	4.22
Vas.....	1.34ft <sup>3</sup> 37.9L
Cms.....	0.24mm/N
Sd.....	332cm <sup>2</sup>
Mms.....	113g
Mmd.....	106g
BL.....	10.80
Revc.....	3.44 ohms
Xmax (linear).....	+/-10mm +/-0.40in
Xmech (peak).....	+/-22mm +/-0.87in

# DUB EDITION DUBw10 TECHNICAL DATA

## Sealed Enclosure

Fill all sealed enclosures loosely (8 oz per cubic foot) with polyester batting or similar material for best bass performance

### Thumpin'

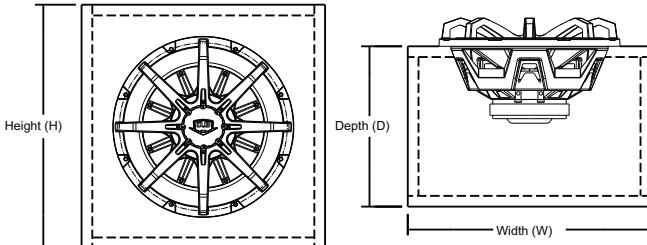

Enclosure Volume (Internal) =  $0.5 \text{ ft}^3$  (Vb)  
Example Dimensions: 12"H x 12"W x 10"D  
F3 = 44Hz, Qtc = 1.1

### Hard Hitting

Enclosure Volume (Internal) =  $0.75 \text{ ft}^3$  (Vb)  
Example Dimensions: 12"H x 14"W x 12"D  
F3 = 42Hz, Qtc = 0.95

### Bangin' Bottom End

Enclosure Volume (Internal) =  $1.0 \text{ ft}^3$  (Vb)  
Example Dimensions: 12"H x 18"W x 12"D  
F3 = 39Hz, Qtc = 0.9

## Vented Enclosure

Line four walls of vented enclosures with 2" thick polyester batting or similar material for best bass performance

### Thumpin'

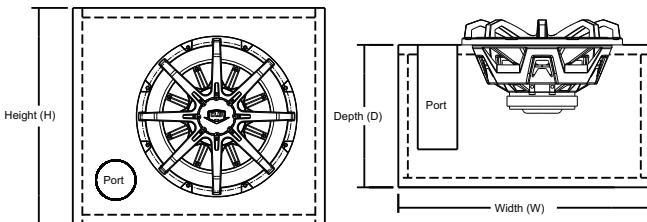

Enclosure Volume (Internal) =  $0.65 \text{ ft}^3$  (Vb)  
Example Dimensions: 12"H x 12.5"W x 12"D  
Port: 2.5" Inside Diameter (ID) x 14.5" Long  
FB = 35Hz, F3 = 39Hz

### Hard Hitting

Enclosure Volume (Internal) =  $0.85 \text{ ft}^3$  (Vb)  
Example Dimensions: 12"H x 15.5"W x 12"D  
Port: 2.5" Inside Diameter (ID) x 13.0" Long  
FB = 32Hz, F3 = 36Hz

### Bangin' Bottom End

Enclosure Volume Internal =  $1.1 \text{ ft}^3$  (Vb)  
Example Dimensions: 12"H x 19.5"W x 12"D  
Port: 2.5" Inside Diameter (ID) x 11.25" Long  
FB = 30Hz, F3 = 32Hz

## Recommended Enclosure Dimensions

### Attention

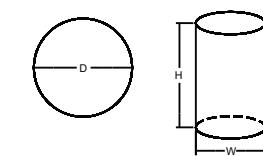

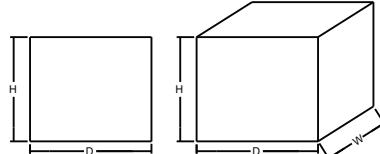

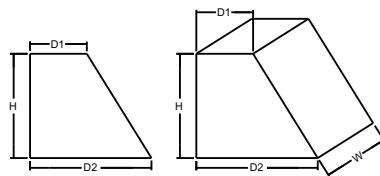

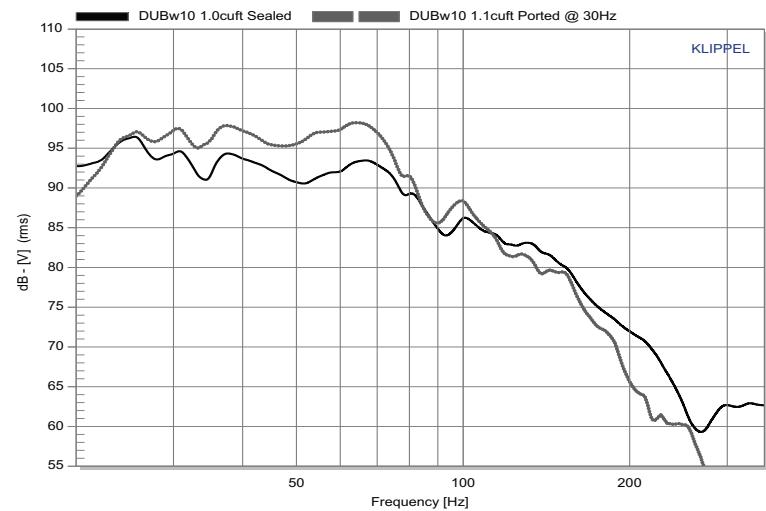

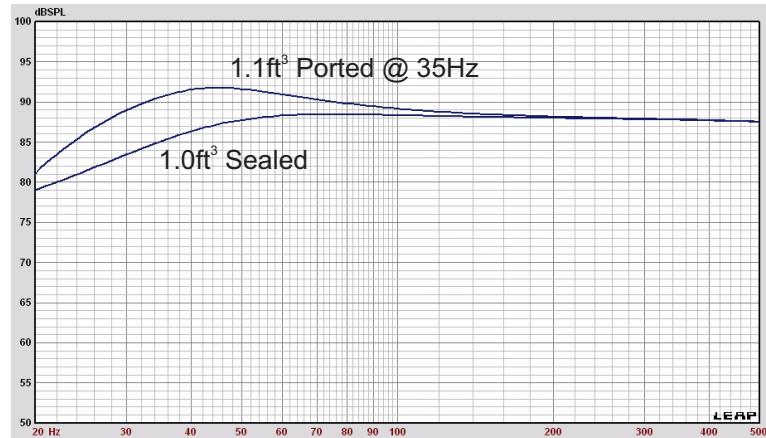

- Use 3/4" MDF
- Use wood glue in joints
- Use screws every 4 inches
- Seal cracks inside box
- Dimensions are external

### Attention

- Utilisez avec MDF de 3/4"
- Appliquez de la colle à bois dans les onglets
- Placez les vis tous 4"
- Bouchez les fissures à l'intérieur de la boîte
- Les dimensions indiquées sont celles à l'extérieur

### Atención

- Use una tabla de MDF de 3/4"
- Use pegamento para madera en las uniones
- Use tornillos cada 4"
- Selle las grietas adentro de la caja
- Dimensiones externas

### Common Math

Trapezoid Area =  $H \times (D_1 + D_2)/2$   
Trapezoid Volume =  $H \times (D_1 + D_2)/2 \times W$   
Rectangle Area =  $H \times D$   
Rectangular Box =  $H \times W \times D$   
Circle Area =  $0.79 \times D \times D$   
Port Volume =  $0.79 \times D \times D \times H$

### Common Conversions

Cubic Feet = Cubic Inches / 1728  
Cubic Feet = Liters / 28.3  
Liters = Cubic Feet x 28.3  
Inches = Meters x 2540  
Square Inches = Square Feet / 144
