

A great main or surround speaker, the Nanosat Prestige is ready to take on any challenge set forth by the most demanding artists or directors, regardless of where it's positioned. It uses premium materials and exclusive Omnipolar® technology to radiate 360° of sound evenly throughout your room.

Available in three sophisticated designer finishes: high-gloss black, white or rosewood, the Nanosat Prestige is extremely versatile. While included brackets make wall mounting a breeze, the speaker also sits nicely on a shelf or table. Mount it to an optional MS-STB floor stand for further placement flexibility.

Adding to its adaptability, the Nanosat Prestige works well in a variety of audio applications. It's sold individually so users can build a system that's customized to their needs. However, Mirage also offers a pre-packaged Prestige 5 system, which bundles four high-gloss black Nanosat Prestige speakers and a Nano CC into one box.

Exclusive Omnipolar® technology benefits:

- Immersive 360° audio entertainment; wherever you go, the sound follows
- Perfect balance of direct and reflected sound, for accurate, realistic listening
- Placement versatility without sacrificing performance

Specifications	
System Type	Omnipolar® satellite speaker
