

News Release

VOXX Advanced Solutions Introduces Live Streaming Body Camera

HAUPPAUGE, NY & LAS VEGAS, NV – JANUARY 4, 2017 – LVCC, CENTRAL HALL BOOTH 13517- [VOXX Advanced Solutions Corporation \(VASC\)](#), a wholly-owned subsidiary of [VOXX International Corporation](#) (NASDAQ: VOXX), announced today the introduction of ACCU.C 4G, a streaming 4G body camera designed to provide clear, accurate video and audio footage. The ACCU.C 4G body camera has been developed in cooperation with S4 Worldwide, a supplier of advanced law enforcement technology and hardware. ACCU.C 4G provides law enforcement and others with a streaming wearable body camera with limitless use cases far beyond the capabilities of standard body cameras available today. The ACCU.C 4G device will be available late Spring 2017.

Designed for the specific needs of law enforcement officers, the ACCU.C 4G body camera integrates streaming communication into a rugged, portable and reliable design, which is sure to surpass all expectations with a perfect combination of form and function. Recording in full high-definition video with a super-wide viewing angle up to 120-degrees and built-in GPS for real-time location tagged videos, the ACCU.C 4G body camera provides users with the ability to stream and/or record events as they happen. This device also provides certified users with a real-time assessment of ongoing events as they are happening and can live stream footage to nearby connected devices with text alert notifications.

“The introduction of ACCU.C 4G provides advanced technology to law enforcement and other organizations by providing streaming capabilities beyond what is available in the traditional body camera market. Entry into this category affords us the opportunity to service a new channel of distribution in a high-profile, emerging market,” said Tom Malone, President, VOXX Advanced Solutions Corporation. “Law enforcement will now have the same capabilities that most cell phone equipped bystanders have today. The addition of ACCU.C 4G will provide law enforcement the ability to capture and stream real-time situations as they occur.”

Additionally, this camera features a 2.0” digital LCD screen for instant playback and review, offers the ability to set pre/post event recording, captures still-photos during video recording and enables audio memo recording. The ACCU.C 4G body camera is extremely versatile in any situation with up to a

10-hour battery life, waterproof housing, infrared night vision, and multiple mounting options and accessories.

The ACCU.C 4G body camera provides a complete and secure end-to-end solution with a smooth transfer from event capture to file upload always preserving the complete integrity of a secure chain of custody for all audio and video content. The ACCU.C 4G body camera will automatically upload content captured via Wi-Fi, LTE and/or direct download when placed into charging stations so footage is never handled by human hands.

An integral piece of making the ACCU.C 4G body camera a complete end-to-end solution is BlueWitness data management software, providing remote archiving capabilities to store, search and review captured footage. The BlueWitness dashboard gives certified users the ability to observe live situations to appropriately respond in real-time. BlueWitness is CJIS compliant and provides users with customized data retention profiles to control data storage with end to end encryption and digital finger printing to ensure tamper proof evidence.

VOXX Advanced Solutions will be introducing a line of innovative body cameras under the ACCU.C name. The introduction of **ACCU.C 4G** is the premium camera under this new product line with **ACCU.C Wi-Fi** and **ACCU.C 360** launching in the coming months.
