

Distracted Driving – Zoomsafer

Zoomsafer is a mobile application downloaded to your teenager's smartphone (or your own!). This application blocks the use of their smartphone while driving, unless a hands free/Bluetooth device is present. While they are driving Zoomsafer enters "Safe Mode" – this silences alerts and notifications – blocks the ability to email, browse and launch applications*. While driving, texts and calls are blocked automatically and are available to view/respond when the vehicle is parked*. Zoomsafer's "Safe Mode" can be overridden for 3 "White List" contacts and Emergency calls (911). Any time the phone is used in "Safe Mode" or "Passenger Mode" is engaged while the vehicle is in motion – a predetermined (family member) is contacted via text or email.

*** Due to iOS limitations – texts/calls and internet/emails are only deterred – blocking these functions are only available on Android.***

How do I get Zoomsafer on my smartphone?

1. Register and Activate your Car Connection 2.0 account
2. Once logged in – navigate to the 'Settings' section of the website
3. Near the bottom will be a Distracted Driving – Zoomsafer section
4. Check off 'Notify Zoomsafer' and then 'Submit'
5. Zoomsafer will send a 'Welcome Email' - providing instructions to download the Zoomsafer app (Google Play or App Store)
6. Enter your Car Connection 2.0 registered email – Zoomsafer will send you an 'Access Code'
7. Find your 'Access Code' in the email from Zoomsafer
8. Using your 'Access Code' register for Zoomsafer via the App
