#### ALL ENERGY BRAND COMPONENTS WERE DEVELOPED WITH THESE SONIC PRINCIPLES IN MIND:

- Flat On-Axis Frequency Response with Wide Bandwidth**  
 Speakers should reproduce the entire audio range in a uniform manner. By ensuring that no one frequency dominates any other, Energy speakers ensures that every note is the way it was intended to be—and the sound is as natural as possible.
- Wide and Constant Dispersion**  
 Sound at all frequencies radiating from the speaker should be in an even pattern, in all directions throughout the room.
- Low Distortion and Resonance**  
 No speaker system is totally distortion- or resonance-free, but Energy speakers have achieved a significantly lower distortion level—a clearly audible improvement.
