

1. Charge the earbuds and case

For best performance, we recommend you charge your EarCanz TRU 2 earbuds and charging case fully before using them.

Make sure the earbuds are seated firmly in the case as shown here.

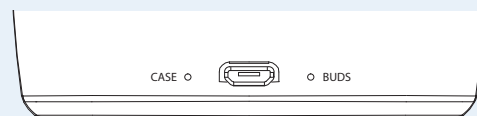

Plug the micro-USB end of the included USB charging cable into the charging jack on the back of the charging case.

Plug the other end of the charging cable into a USB power source (like a computer or a USB charger).

Charge now...charge on the go!

While you're charging the buds, the case is charging, too. And a fully charged case can provide up to 3 full charges for the buds! The indicators on the back of the charging case (and on the earbuds themselves) tell you what's going on while you're charging.

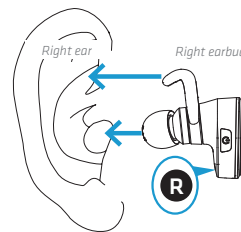

CASE charging indicator turns red while the case is charging (which usually takes longer than the buds themselves). It turns off when the case is fully charged.

BUDS charging indicator turns red while the buds are charging (indicators on the sides of the buds themselves also turn red while charging). It turns off when the buds are fully charged.

IMPORTANT: These earbuds were designed to be charged in their case only, either with the case plugged in to a power source or from the case's battery (if it's charged). They can't be charged separately.

2. Turn on the EarCanz TRU 2

Take the earbuds out of the case when they've finished charging. Place each earbud in its assigned ear (marked R or L on the inside of each bud).

To turn on the EarCanz TRU 2: Press and hold the  button on the back of the right earbud for about 3 seconds, until you hear "power on."

Then press and hold the  button on the front of the left earbud for about 3 seconds, until you hear "power on."

To turn the EarCanz TRU 2 off: Press and hold the  button on one of the earbuds for 3 seconds.

Linking for Wireless Stereo

After you turn them both on, the earbuds start the linking process for wireless stereo. The indicator on the back of each earbud starts blinking red and white, then white when the earbuds are linked to each other. The left earbud says "left connected" and the right says "right connected." Now you're ready to pair with your smartphone or other Bluetooth device!

If you don't hear "left connected" and "right connected": Turn the earbuds off (press and hold the  button until they say "power off"). Then turn them both back on again.

If you still don't hear the two earbuds link: Reset them by (1) turning them off, (2) pressing and holding the  button on both earbuds for 15 seconds. Then continue with the Pair + Connect instructions in the next panel.

3. Pair + Connect

Enable Bluetooth on your smartphone or other device.

Choose **808 EarCanz TRU 2** from the pairing options on your smartphone. (If it's not in the list, choose "Scan" from your phone's Bluetooth menu.)

IMPORTANT: If you've previously paired your phone or other Bluetooth device with these earbuds, the earbuds will automatically attempt to reconnect to that device when you turn them on. If you want to pair to a new device, turn Bluetooth off on the previously paired device. The earbuds will enter pairing mode. Then choose **808 EarCanz TRU 2** from the pairing options on the new device.

The earbuds say "device connected" when the process is complete. The indicators blink white every 6 seconds.

Note: The process of enabling Bluetooth and connecting varies from device to device. See your device's owners manual for more information and specific instructions.

3. Pair + Connect (continued)

Bluetooth Wireless Connection Tips

- Make sure the Bluetooth capability of your device is turned on.
- The earbuds' Bluetooth wireless connection works up to a range of roughly 33 feet (10 meters). This range may vary, however, based on other factors, such as room layout, wall material, obstacles, your device's Bluetooth performance, etc. If you're having problems connecting to the earbuds, move closer to your phone.
- Make sure your device supports audio transfer A2DP.
- If your device asks you for a password to connect, use "0000".

To pair the EarCanz TRU 2 again

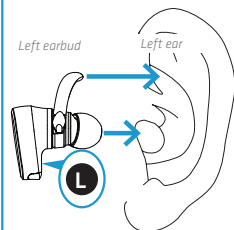

After turning your earbuds back on, they automatically attempt to reconnect to the last connected device. If the last connected device is not available, the earbuds will enter pairing mode and be ready to pair to a new or different device.

Forget to turn on your device's Bluetooth before turning on the earbuds? Just turn both earbuds off and back on once you've turned on your device's Bluetooth to reconnect to it (or choose "EarCanz TRU 2" from the Bluetooth menu on your phone if it's still available when you turn Bluetooth on).

Using the EarCanz TRU 2

Putting the EarCanz TRU 2 in your ears

The EarCanz TRU 2 earbuds come with medium-sized eartips and ear fins installed. You can use different-sized tips and fins, but first try them with the medium sizes.

Find the L and R markings on the buds.

Place each eartip in your ear as shown here. The fin should go in the small ridge just above your ear canal on your outer ear—it might go automatically, or you might need to move it into place.

If the tips or fins don't fit, follow the directions in the next section to change them.

Changing the eartips or fins

If you want to use a different size ear fin or bud, find the size you want, and match the L/R fins to L/R buds.

Listening to music

Set your device's volume for music to 50%.

Note: This is to make sure the sound from the earbuds isn't too loud when you start streaming.

Start playing music or other audio on your device. Within seconds, the earbuds start streaming the audio via Bluetooth.

Controlling playback and volume

The  button on either earbud lets you control music playback wirelessly.

To play/pause music: Press the  button.

To skip to the next track: Give a quick double-press to the  button.

To adjust volume: Use the volume controls on your phone.

Using single earbuds

You can use either earbud by itself as an earpiece for Bluetooth calls.

To use the right earbud by itself: Turn it on and leave the left earbud off.

To use the left earbud by itself: (1) Leave the right earbud off, (2) press and hold the left earbud's  button for 6 seconds until it says "pairing," and (3) follow the Pair + Connect instructions on the other side of this sheet. (You only need to do this the first time you use the left earbud by itself—after that you can just turn it on with the right bud off.

Answering/ending phone calls

Both earbuds have built-in microphones, so you can use them for phone calls. Your phone will ring through when you're receiving a call.

To answer or end a phone call: Give a short press on the  button.

To decline a phone call: Press and hold the  button for one second.

IMPORTANT: Not all phones support playback control and phone answer/end control. Check your phone's user manual for more information if you're having trouble with these functions.

Turning the EarCanz TRU 2 Off

To turn the EarCanz TRU 2 off: Press and hold the  button on one of the earbuds for 3 seconds.
