

4. Side-to-side and front-to-back adjustments can be made by firmly grasping your display and carefully moving it to the desired position.

Fig. 7

5. If any of the arms become too loose to hold their position, they can be tightened using the Alley Key provided in your hardware kit (see Fig. 6).
6. To adjust the tilt position of your display, have one person hold the display in place while another person loosens the two tilt adjustment knobs located on either side of the mount (see Fig. 7). Once the knobs are loose, move the display to the desired angle. Tighten the knobs securely before releasing the display. NOTE: The tilt adjustment knobs have a ratchet feature. If you need to change the position of the knob without tightening or loosening the screw, simply pull the knob out before moving it.
