

Step 1: Unpack

Make sure the following items came in this package.

- Canz 2 wireless speaker
- USB charging cable
- 3.5mm audio cable

If you have any questions about this product, visit 808Audio.com or call our toll-free help line at 1-800-732-6866.

Step 2: Charge up!

Before you start using your Canz 2 speaker, you need to charge its built-in battery.

Plug the included USB charging cable into the **DC IN** jack on the back of the speaker.

Plug the other end of the charging cable into a USB power source (like a computer or a USB charger).

The charging indicator on the back of the speaker illuminates red while the speaker is charging. It turns green when the speaker is fully charged.

Step 3: Turn on

Press the  button on the bottom of the speaker to turn the speaker on.

The speaker beeps and the light on the front of the speaker starts blinking.

Step 4: Pair + Connect

Enable Bluetooth on your smartphone or other device.

Make sure the light on the front of the speaker is blinking rapidly. (If it isn't, give a quick double-press to the  button on the bottom of the speaker—the speaker beeps.)

If you've previously paired your phone or other Bluetooth device with this Canz speaker, the speaker will automatically attempt to reconnect to that device when you switch the speaker on. If you want to pair to a new device, give a quick double-press to the  button on the bottom of the speaker—the speaker beeps.

Choose **808 Canz 2** from the pairing options on your smartphone. (If it's not in the list, choose "Scan" from your phone's Bluetooth menu.)

The speaker beeps when it's finished pairing and connecting to your smartphone. The indicator light on the front of the speaker turns solid blue.

Note: The process of enabling Bluetooth and connecting varies from device to device. See your device's owners manual for more information and specific instructions.

Bluetooth Wireless Connection Tips

- Make sure the Bluetooth capability of your device is turned on.
- Make sure there's nothing plugged into the speaker's **AUX IN** jack when you're trying to use Bluetooth.
- The Canz 2 Bluetooth wireless connection works up to a range of roughly 33 feet (10 meters). This range may vary, however, based on other factors, such as room layout, wall material, obstacles, your device's Bluetooth performance, etc. If you're having problems connecting to the speaker, move closer to it.
- Make sure your device supports audio transfer A2DP.
- If your device asks you for a password to connect, use "0000".

Step 5: Play music

Set your device's volume for music to 50%.

Note: This is to make sure the sound from the speaker isn't too loud when you start streaming.

Start playing music or other audio on your device. Within seconds, the speaker starts streaming the audio wirelessly via Bluetooth.

To adjust the volume of your audio: Use the Volume controls on your phone.

Using the AUX IN

Use the 3.5mm audio cable included with your speaker to connect the audio output from your device to the **AUX IN** audio input on the speaker's back panel. The speaker automatically switches to the **AUX IN** audio.

To listen to Bluetooth audio again, unplug the cable from the speaker's **AUX IN** jack.

Tour of the Canz 2 speaker

Back panel

AUX IN jack lets you connect an audio device directly to the speaker using a 3.5mm audio cable.

DC IN jack connects to the provided USB charging cable to recharge the speaker's battery.

Charge indicator light shows the charging status of the speaker: red while charging, green when full.

Front panel

Pair indicator light shows the status of the speaker:

- fast blinking while pairing
- slow blinking while reconnecting
- solid blue when paired
- solid white when the AUX IN jack is in use
- off when the speaker's off.

Speaker bottom

⏻ button turns the speaker on or off (press and hold) and puts the speaker into pairing mode to connect to a new Bluetooth device, like a smartphone (double-press). This button also works as a play/pause button when you're playing audio via Bluetooth.
