HEX**SL**™

WIRELESS SPEAKER

QUICK START GUIDE

Getting to know Bluetooth

Bluetooth wireless is a quick and easy way to connect a smartphone to a speaker or a headset. There are basically two steps to making Bluetooth work.

PAIRING:
The two devices get to know each other.

"Hi. I'm a phone."

"Hi phone. I'm a speaker."
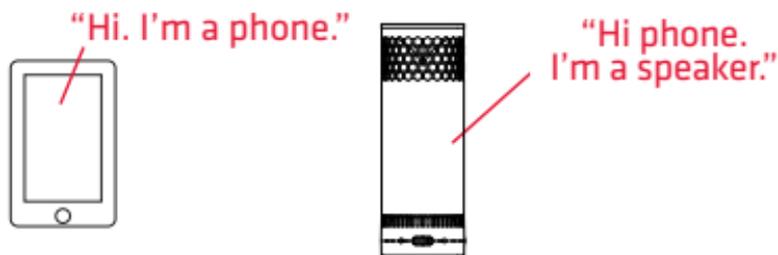

CONNECTING:
The two devices do something together (like play music).
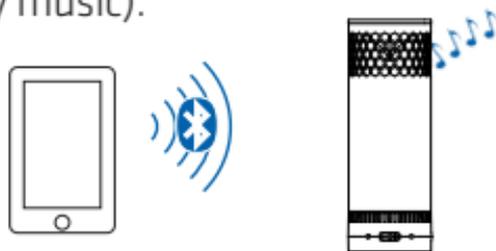

This guide takes you through the steps to get started.

Step 1: Unpack

Make sure the following items came in this package.

Your speaker

Audio cable

USB cable

Step 2: Charge the SL

Before you start using the HEX SL speaker for the first time, it's a good idea to charge it completely.

To charge the speaker:
Plug the included USB cable into the **Charge** jack on the back of the speaker.

Speaker back

Plug the other end of the USB charging cable into a power source, like a computer or a USB charging adapter.

The charging indicator on the front of the speaker is red while the speaker is charging. It turns green when the speaker is fully charged.

Speaker front

Note: You can use the speaker while it's charging.
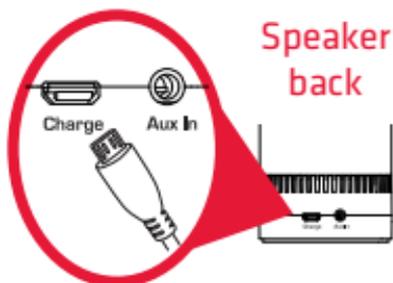

Step 3: Turn on

Flip the **OFF / ON** switch on the bottom of the speaker to the **ON** position. The power up tone sounds and the indicator light on the front of the speaker starts blinking.

Speaker bottom

OFF ON
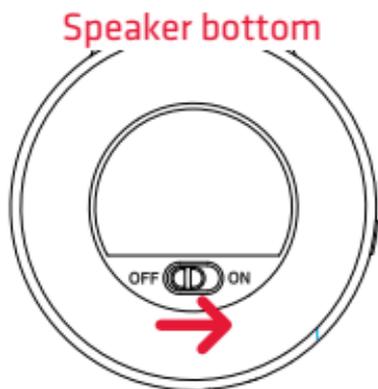

After a few seconds, the speaker goes to Bluetooth pairing mode to set up with your smartphone.
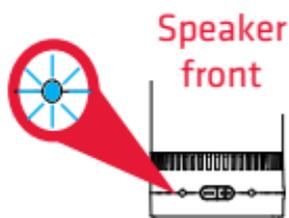

Speaker front

Step 4: Pair + Connect

Enable Bluetooth on your smartphone or other device.

Make sure the indicator light on the front of the speaker is blinking rapidly. (If it isn't, press and hold the **Pair** button on the side of the speaker until the speaker gives an audio signal.)

Speaker front
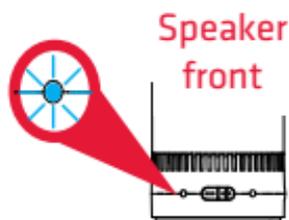

If you've previously paired your phone or other Bluetooth device with this speaker, the speaker will automatically attempt to reconnect to that device when you switch the speaker on. If you want to pair to a new device, press and hold the **Pair** button on the side of the speaker until the speaker gives an audio signal.

Choose **808 Hex SL** from the pairing options on your smartphone. (If it's not in the list, choose "Scan" from your phone's Bluetooth menu.)
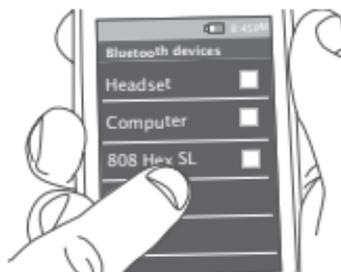

The speaker gives an audio signal when it's finished pairing and connecting to your smartphone. The indicator light on the front of the speaker turns solid blue.

Note: The process of enabling Bluetooth and connecting varies from device to device. See your device's owners manual for more information and specific instructions.

Bluetooth Wireless Connection Tips

- Make sure the Bluetooth capability of your device is turned on.
- Make sure there's nothing plugged into the speaker's AUX IN jack when you're trying to use Bluetooth.
- The Bluetooth wireless connection works up to a range of roughly 33 feet (10 meters). This range may vary, however, based on other factors, such as room layout, wall material, obstacles, your device's Bluetooth performance, etc. If you're having problems connecting to this speaker, move closer to it.
- If your device asks you for a password to connect, use "0000".

# Step 4: Play music

Set your device's volume for music to 75%.

Note: This is to make sure the sound from the speaker isn't too loud when you start streaming.

Start playing music or other audio on your device. Within seconds, the speaker starts streaming the audio wirelessly via Bluetooth.

To adjust the volume of your audio: Use the **–** and **+** buttons on front of the speaker. You can also use the volume controls on your phone.

Speaker front
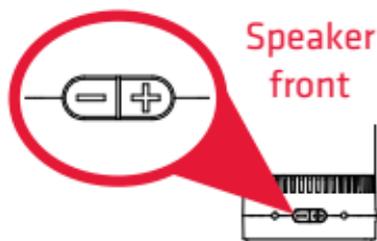

Note: If you notice sound distorting even at low volumes, turn the volume down on your phone.

6

Using the Aux In input

Use the audio cable included with this speaker to connect the audio output from your device to the **Aux In** audio input on the speaker's back panel.

Speaker back

Charge   Aux In
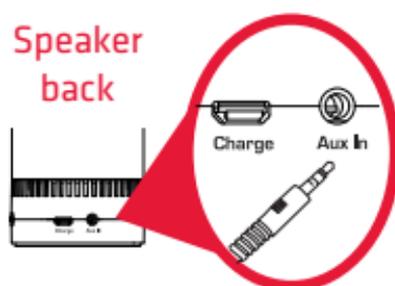

The speaker automatically switches to the **Aux In** audio, and the pairing indicator on the front of the speaker turns white.

To listen to Bluetooth audio again, unplug the cable from the speaker's **Aux In** jack. The speaker will try to reconnect to the last Bluetooth device.

Tour of the speaker

Front of the speaker

Pairing indicator shows
the Bluetooth status of
the speaker:

Pairing
indicator

Charging
indicator
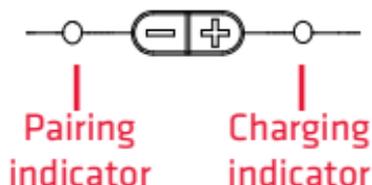

- fast blinking blue while pairing
- slow blinking blue while reconnecting
- very slow blinking blue when disconnected
  and in standby mode
- solid blue when paired
- solid white when the Aux In jack is in use
- off when the speaker's off.

Charging indicator shows the charging status
of the speaker:

- solid red while charging
- solid green when charged

– and **+** adjust the volume of the speaker.

Side of the speaker

Pair button puts the speaker into pairing mode to connect to a new Bluetooth device, like a smartphone.

Back of the speaker

Aux In jack lets you connect an audio device directly to the speaker using the provided audio cable.

Charge jack connects to the provided USB charging cable to plug the speaker into a power source or adapter.

Bottom of the speaker

OFF ON switch turns the speaker on and off.
