

TAKE CLASSIC I/O 4

DESIGNED TO PERFORM IN LESS-THAN-IDEAL CONDITIONS

The Energy Take Classic I/O 4 speaker allows you to send your music where your mood takes you. It's solid, UV-treated, ABS cabinet and rust resistant grille can handle the workout of a sun-drenched patio or a humid sunroom. It also performs well as an indoor speaker, with mounting options to take it out-of-the way in an exercise room or garage or basement workshop.

TWO-WAY DESIGN

Just because it can be placed in secondary living areas doesn't mean it has to have secondary sound. A separate tweeter matched with a robust woofer assures that you get excellent, full-range sound wherever you place it.

5-WAY BINDING POSTS

With the same quality wire terminals found in our most expensive home theater speakers, you can rest assured that the connection you decide to use will stay securely connected even when the weather becomes unfriendly.

MULTIPLE MOUNTING OPTIONS

The included mounting brackets allow a vertical or horizontal mounting while the unique, dual M6 threaded inserts allow specialized business and residential installations.
