EyeLock Completes Integration with Genetec Unified Platform

Iris-based identity authentication manufacturer completes 7th access control system integration

NEW YORK, NY – SEPTEMBER 27, 2018 - [EyeLock LLC](#), a leader of iris-based identity authentication solutions, announced today the Company has completed the integration with the Genetec [Security Center Synergis™](#) access control platform, ensuring dependable, rapid and hassle-free iris template management within the access control platform.

The Synergis IP access control system (ACS) heightens the security of an organization and increases its readiness to respond to incidents and threats, while leveraging any existing network and security equipment investments. With advanced security measures and support for an ever-growing number of 3rd party access control devices, the Synergis system gives organizations the confidence to protect its people and assets.

“We are delighted to become a key part of the Genetec Synergis offering”, said Jeff Carter, Chief Executive Officer of EyeLock. “By including EyeLock products that are fully integrated with Genetec access control systems, our network of experienced, value added resellers and system integrators will be able to help realize substantial features and business benefits for both our organizations.”

In addition to speeding up the onboarding process by eliminating dual-data entry for our mutual customers, the integrated interface into Synergis enables intelligent onboard memory management within the iris readers. Utilizing an individual’s access control permissions, the system is able to determine and distribute iris templates only to doors which are necessary.

“The Genetec Security Center software developer’s kit (SDK) enabled EyeLock with the ability to fully embed the entire iris enrollment process inside of the Security Center interface, and provided a completely unified experience for the end user,” said Thibaut Louvet, Product Group Director for Access Control at Genetec. “Having a fully embedded experience with Synergis and the EyeLock biometric hardware will improve operational efficiency by accelerating onboarding and management for our access control users.”

This integration is part of EyeLock’s Identity Suite (EIS) and was written entirely using EyeLock’s software development kit (SDK). The combination of EIS and the SDK have made it possible to enable and significantly accelerate the onboarding of iris-based identity authentication technology onto a myriad of platforms including access control and IT security. Iris technology is now more efficient and cost-effective than ever before, and EyeLock’s solutions are ready to be implemented uniformly on a global basis.

EyeLock has also entered into a business relationship with Genetec Inc, to offer its iris biometrics products within the Genetec network of certified channel partners, value-added resellers and system integrators.

About EyeLock

EyeLock LLC is an acknowledged leader in advanced iris authentication for the Internet of Things (IoT), providing the highest level of security with EyeLock ID™ technology. Iris authentication is highly secure because no two irises are alike and the iris is the most accurate human identifier other than DNA. The company's significant IP portfolio, including more than 75 patents and patents pending, and proprietary technology enables the convenient and secure authentication of individuals across physical and logical environments. EyeLock's solutions have been integrated and embedded across consumer and enterprise products and platforms, eliminating the need for PINs and passwords. Corporations across the Fortune 500 recognize the level of security EyeLock provides due in part to its extremely high false acceptance rate, ease of use, and scalability. As a sponsor member of the Fast Identity Online Alliance (FIDO), a non-profit organization dedicated to creating a safer and more secure digital presence for consumers, EyeLock is dedicated to advancing digital privacy and next generation security.

About VOXX International Corporation:

VOXX International Corporation (NASDAQ: VOXX) has grown into a worldwide leader in many automotive and consumer electronics and accessories categories, as well as premium high-end audio. Today, VOXX International Corporation has an extensive distribution network that includes power retailers, mass merchandisers, 12-volt specialists and most of the world's leading automotive manufacturers. The Company has an international footprint in Europe, Asia, Mexico, South America, and a growing portfolio, which now comprises over 30 trusted brands. Among the key domestic brands are Klipsch®, RCA®, Invision®, Jensen®, Rosen Electronics, Audiovox®, Terk®, Acoustic Research®, Advent®, Code Alarm®, 808®, and Prestige®. International brands include Klipsch®, Jamo®, Energy®, Mirage®, Mac Audio®, Magnat®, Heco®, Schwaiger®, Oehlbach® and Incaar™.
